SESSION - 2024-25

ENTRANCE EXAM

STUDY MATERIAL AND SAMPLE PAPER

Topic : Body Parts

Our body has many parts. Each of these body parts is called an organ.

Organs are of two types :

- ◆ External organs
- ◆ Internal organs

External organs

External organs are the body parts that we can see. For example, eyes, ears, nose, legs, hands, etc.

Each organ of our body does a job called its function. Hands and arms help us to do many functions.

Legs and feet help us to perform various activities

SENSE ORGANS

We have five sense organs that help us to know about the things around us.

- ◆ eyes
- ◆ ears
- ◆ nose
- ◆ tongue
- ◆ skin

Eyes: We have two eyes. Eyes help us to see things

around us. We move our eyelids to protect our eyes.

Ears: We have two ears. Ears help us to hear different sounds.

Nose: We have one nose. Nose helps us to smell. Smell can be good or bad. Nose also helps us to breathe.

Tongue: We have one tongue. It helps us to taste. Tastes are of different types.

- **Skin**

Skin covers our entire body. It helps us to feel. It is the largest sense organ. we can feel cold, hot, hard, soft, etc., We should take care of our sense organs.

INTERNAL ORGANS

The organs inside our body are called internal organs. We cannot see them as they are covered by the skin. Brain, heart, lungs, stomach, etc., are some of our internal organs.

The brain controls all the activities of our body. It helps us to think, learn and remember.

The heart pumps the blood to all the parts of our body.

The lungs help us to breathe.

The food that we eat gets digested in our stomach.

ELDER TALK

To keep our body healthy, we must exercise and play outdoor games.

TOPIC : HOUSES

We all need a house to live in . A house protects us from sun, rain, cold and storm. It keeps us safe from thieves and stray animals. It also keeps us away from dust, dirt and insects.

Houses are of many kinds. People build houses according to their needs. For e.g. :- Some people make big houses and some people make small houses according to their resources and needs.

KIND OF HOUSES

- **Portable houses:-**

Houses that we can move easily are called portable houses.

- **Kutcha houses :-**

Houses that are made of mud, wood, bamboo, clay and straw. They are temporary.

- **Pucca houses :-**

Houses made of brick, cement, steel, iron and wood are called pucca house.

- **Stilt house:-**

Houses that are build on high bamboo poles Called stilts.

- **Igloo:-** Igloos are houses made of snow. They are built in extremely cold places.
